But I keep getting this error "Error 300002: The selected serial number was not saved because the previous serial number was not installed." and all that I get is this on the screen "Errors List: " 300002 : The selected serial number was not saved because the previous serial number was not installed I have tried uninstalling CS3 and re installing and I have also tried re installing with serial. Please Help! Thanks A: That error means that your license key entered on installation didn't match the one on your CD.

In this case, it means the key entered was from the previous version. You could try that, but it's probably easier to get a new license key through Adobe. What you need to do is: Clean install (not reinstall) Go to the set up page of the program Find the place where you enter the serial number and click on the pencil On the next page, enter your license number (you need to purchase a new license if you didn't before) Save this. Now you can go back to the software install page and enter the serial number that is in your CD. Usually this solves the problem. If not, you can try the instructions on Adobe's website. /* *
